

LOS CACTUS

· COLCHAGUA VALLEY ·

118 ha / 292 ac planted

LOCATION:

Los Cactus is located in the Coastal drylands of Colchagua Valley, immerse in the locality of Marchigue, VI Region.

Our vineyards are expanded in smooth hills and slopes, very characteristic landscapes of these spots.

CLIMATE:

Los Cactus has a temperate Mediterranean climate but with a very special condition product of the smooth coastal influence given by the constant and refreshing presence of a breeze that allows a slow ripening of our grapes, achieving the maintenance of the aromas and fruit characteristics of our strains.

SOIL:

The soils of this field have several origins, presenting geological units of a granite type normally associated to steep slope areas, as well as cuts from the presence of ancient stream water giving rise to round rock soils of low fertility. Both formations are the origin of terroirs of great vine growing potential.

PLANTED VARIETIES:

Cabernet Sauvignon, Carmenere, Syrah, Petit Verdot, Malbec, Merlot and Marselan.

WINE CHARACTERISTICS:

Los Cactus presents very exclusive conditions of terroirs in Chile, achieving wines of high fruit expression, round and with soft tannins.
