

*El Algarrobo Estate***PRECISION TERROIR, GLOBAL
EXCELLENCE QUALITY**

Our estate in Las Dichas, Casablanca, is a winemaking treasure. Its unique origin with coastal influence defines the quality and international prestige of our wines.

**The Nobility of the Terroir and its Slopes**

El Algarrobo is a special vineyard. Located in Las Dichas, its environment is key: the coastal influence and the morning fog ensure an ideal cool climate for slow and precise ripening.

The sector's geology is characterized by decomposing granitic soil, associated with reddish clays and a low content of organic matter. The planting is done on hill slopes with controlled exposure, showing a notable concentration of quartz in the profile.

These conditions, along with precision viticultural management, support the production of wines with optimal acidity and structure.

The combination of soils, fog, and winemaking management is responsible for the great character of our wines and their recognitions:

- **Algarrobo Pinot Noir, 2024:** An example of finesse and silky tannins, acclaimed with **96 points DWWA 2025**.
- **Algarrobo Chardonnay 2023:** Shows a fresh profile, high aromatic concentration, with citrus notes and great volume on the palate.
- **Disidente Casablanca 2020:** A Syrah and Tempranillo blend, floral, juicy, and with firm tannins, vinified in clay amphorae to preserve its natural freshness (93 points Tim Atkin).

We have an unparalleled origin! Everyone is invited to discover it and continue enjoying our high-quality wines.
