

ALLIANCE FOR CHILDHOOD: CHOSHUENCO FOUNDATION CERTIFIES 15 FAMILY CENTERS IN MAULE

We celebrate four years of collaborative work strengthening early childhood education and family bonds, following the successful certification of family centers in our region of origin.

At Viña TerraNoble, our sustainability vision is reflected in the continuous support for Maule's communities. We proudly highlight our partnership with Fundación Choshuenco and Fundación Integra. After four years of collaboration, we achieved a key milestone: the successful certification of 15 educational centers in the region where we support Family Centers.

This program empowers parents as their children's first educators. The impact is best described by the families, who value these "cozy and unique" spaces for creating a connection that is often difficult to achieve at home due to daily routines. Mothers highlight the opportunity for quality time, fostering reading and interactive play in an environment that invites them to stay and enjoy with their children.

José Manuel Jaramillo, Executive Director of the Foundation, states: "This is a permanent task that must be sustained by the entire educational community".

For 2026, we enthusiastically look forward to new certification visits and support activities to continue transforming the future of the new generations in Maule.
