

ONGOING 2023

HARVEST AT TERRANOBLE

With the harvest of the first Chardonnay grapes in our emblematic vineyard in the Maule Valley, a new harvest has started at TerraNoble.

Our viticulturists and winemakers and the teams that permanently care for the vineyards have worked throughout the year applying the best sustainable practices aiming to obtain healthy, quality grapes that showcase the best expression of the terroir and characteristics of each the variety.

Now they are walking our vineyards, monitoring the ripening of the grapes in the different blocks to determine the optimum harvest time.

We wish them success!
