

## Carmenere CA

Since 1994, when Chilean Merlot was identified as Carménère, TerraNoble has committed to this rediscovered variety that today has become emblematic to the Chilean wine industry. For 30 years now, TerraNoble has been innovating and experimenting in the vineyards and in winemaking with Carménère.

The CA project is part of this journey. Under similar vinification and aging conditions, we strive to offer different types of Carmenere by accentuating the influence of the Andes Mountains and the Pacific Ocean in our terroir.

We share the history of awards received by our CA1 Andes and CA2 Costa in recognition to our work.
