

Noble Citizenz

As noble citizens, we support the communities of the Maule Valley by actively promoting the Transfer Program of the Pedagogical Management Model developed by Fundación Choshuenco, an NGO with long experience in education and the training and development of the preschool stage linked to the Von Appen family.

The purpose of this program aspires to share the technical-pedagogical experience of Fundación Choshuenco in family and community dimension focusing on strengthening the skills and personal development of fathers, mothers, and guardians thus making them active participants in the education of their children in early childhood.

We are very proud to share with you our commitment to this noble project.c
